

# DAVID BRUNET

Fullstack & DevOps Engineer — Sovereign approach

Sober by design · Sovereign by choice · Production-minded

Status: **ONLINE**

Uptime: 17+ years

Mode: Independent / CTO

## CORE SKILLS

PHP / Symfony

Node.js / React

CI/CD (GitLab)

Docker / Kubernetes

NixOS / Infrastructure as Code

## INFRASTRUCTURE & TOOLS

Linux (Debian, NixOS)

Docker, Helm, ArgoCD

GitLab CI/CD

PostgreSQL, S3-compatible storage

Keycloak, IAM, Auth flows

LLM, RAG, vector databases

## LANGUAGES

French — Native

English — Professional (B2/C1)

## CONTACT

<https://lochot.com>

## SYSTEM OVERVIEW

Senior engineer capable of designing, building and operating complete production systems.

Strong focus on **simplicity**, **long-term maintainability** and **technical sovereignty**.

## PROFESSIONAL LOGS

### 2009 → Present — Independent Engineer / CTO

Architecture, development, infrastructure, CI/CD, security.

Full ownership from idea to production and operations.

Trusted technical partner for long-term projects.

### Before 2009 — Telecom & Network Operations Manager

Management of up to 180 technicians.

Field operations, network troubleshooting, customer support.

Strong grounding in real-world constraints.

## SELECTED DEPLOYMENTS

**Metalearn** — Sovereign learning platform, Kubernetes, CI/CD, infra automation

**Legibus** — Legal AI assistant (LLM, RAG, secure infrastructure)

**MON-GN.com** — E-commerce platform, operations & production support

## SOBEREIGN PRINCIPLES

Prefer clarity over abstraction

Control infrastructure, avoid blind platform dependency

Build systems meant to last, not to impress

Automation serves humans — not the opposite

## TRUSTED ECOSYSTEM

OVHcloud

Scaleway

NVIDIA

EuraTechnologies

CITC Lille
